

News Application Project Document

Title of Project: PulsePoint News(A Full-Stack Web Application for Real-Time News Aggregation, with News Summarization.)

1. What is your project?

PulsePoint News is a full-stack, AI-driven news application that provides real-time, verified, and personalized news updates. It incorporates AI-powered recommendations, fact-checking, user engagement features, and interactive dashboards to make news consumption more informative and impactful.

2. Why are you doing this project?

PulsePoint News aims to provide **fact-checked and reliable news**, ensuring users are informed without misinformation or bias. The platform enhances the user experience with **AI-driven recommendations, news Summarization, real-time alerts, and interactive content**. It also encourages user engagement through discussions and content contributions. Additionally, the project serves as an opportunity to explore **cutting-edge technologies** like AI, NLP, and cloud-based deployment, making news consumption more personalized, efficient, and impactful.

3. How will you do the project?

- **Data Collection:** Gather real-time news from NewsAPI and Web Scraping to extract news from trusted sources.
- **Processing & Analysis:** Use NLP Algorithm to classify news articles under different topics like Climate, Tech, Human Rights and Train an ML model to recommend news based on reading history, likes, and search trends.
- **Decision Making:** Ranking articles based on popularity, reliability, and user engagement.
- **Implementation:** Frontend with React.js, Backend using Node.js with Express.js, Database as MongoDB, Authentication via JWT, and Hosting on Vercel (Frontend) & Render/ (Backend).

- **Evaluation:** Compare system performance by measuring API speed, UI, User Feedback & Engagement Metrics.

4. Team Members: Section A

- *Satyam* (Full-Stack Developer & Project Lead, AI & Machine Learning Integration)
-

This project aligns with SDG Goal 9: Industry, Innovation, and Infrastructure, as it ensures fast, **global access** to trustworthy news content.
